Retention in care

Mauro Schechter, MD PhD

Investigador Principal, Projeto Praça Onze

Professor-Titular de Infectologia

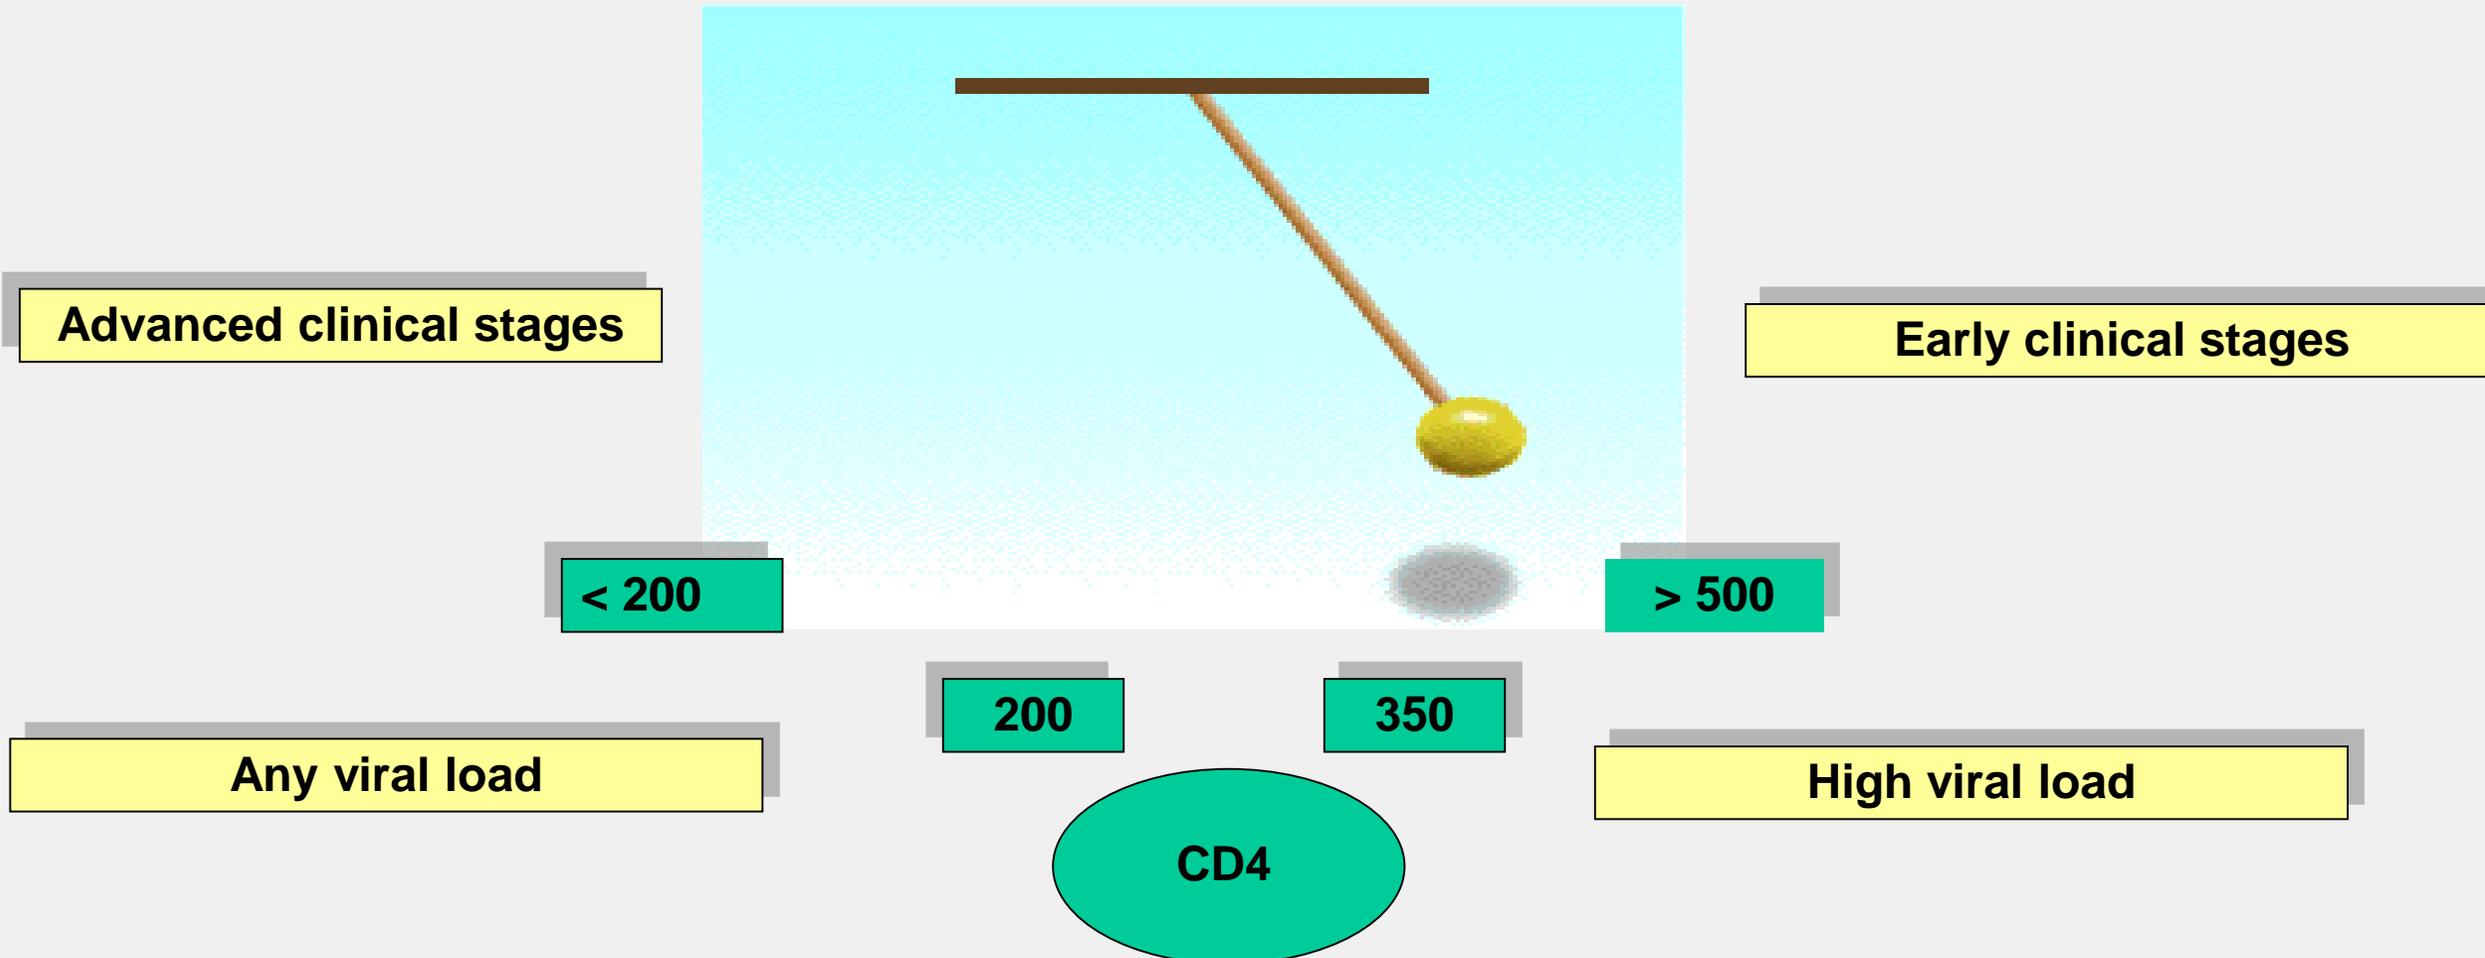

Universidade Federal do Rio de Janeiro

Science and community in the response to HIV in Latin America and the Caribbean

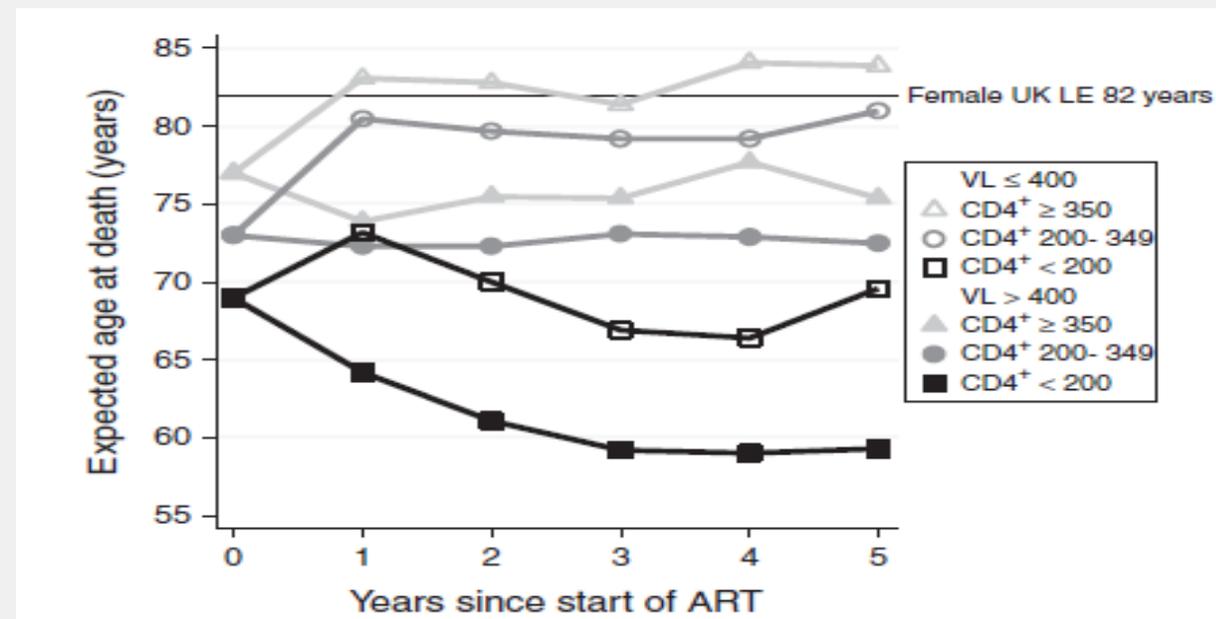

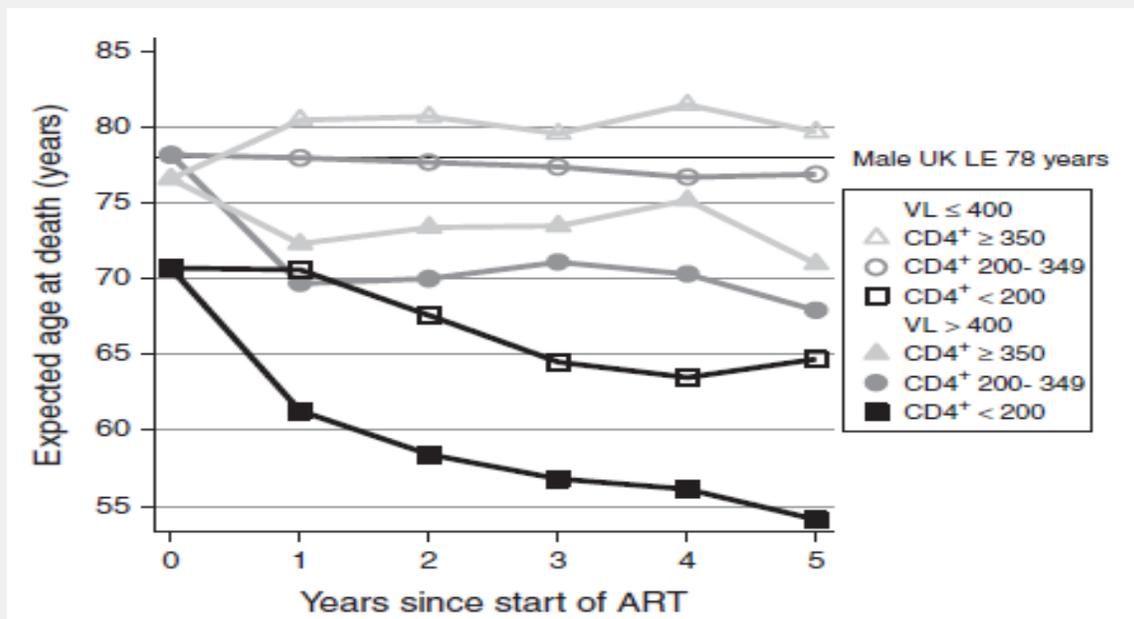

IAS Workshop

Rio de Janeiro, 05 April 2017

When to start antiretroviral therapy

Expectativa de vida aos 35 anos Reino Unido

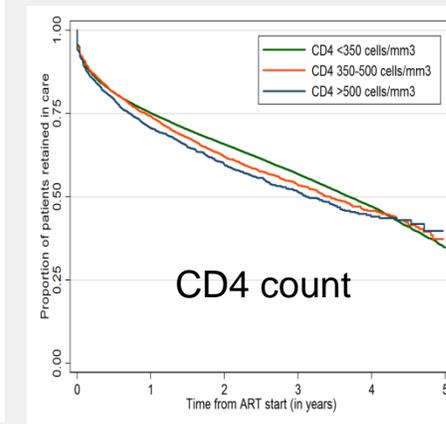

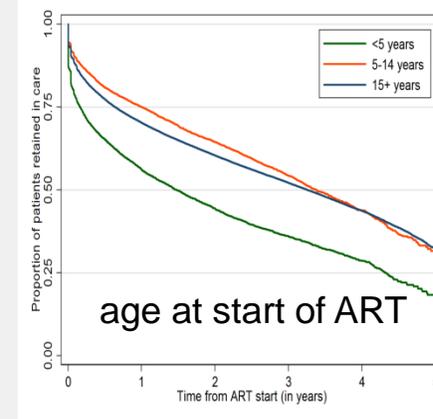

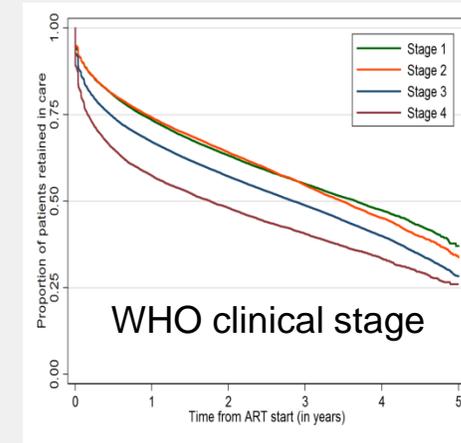

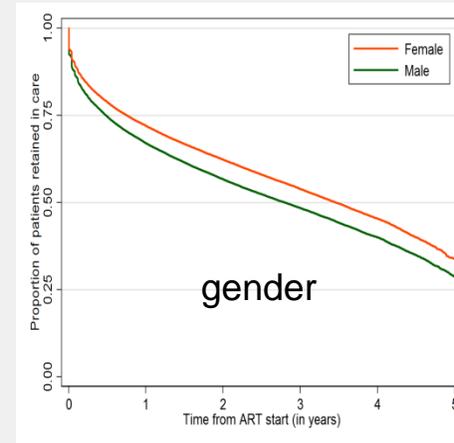

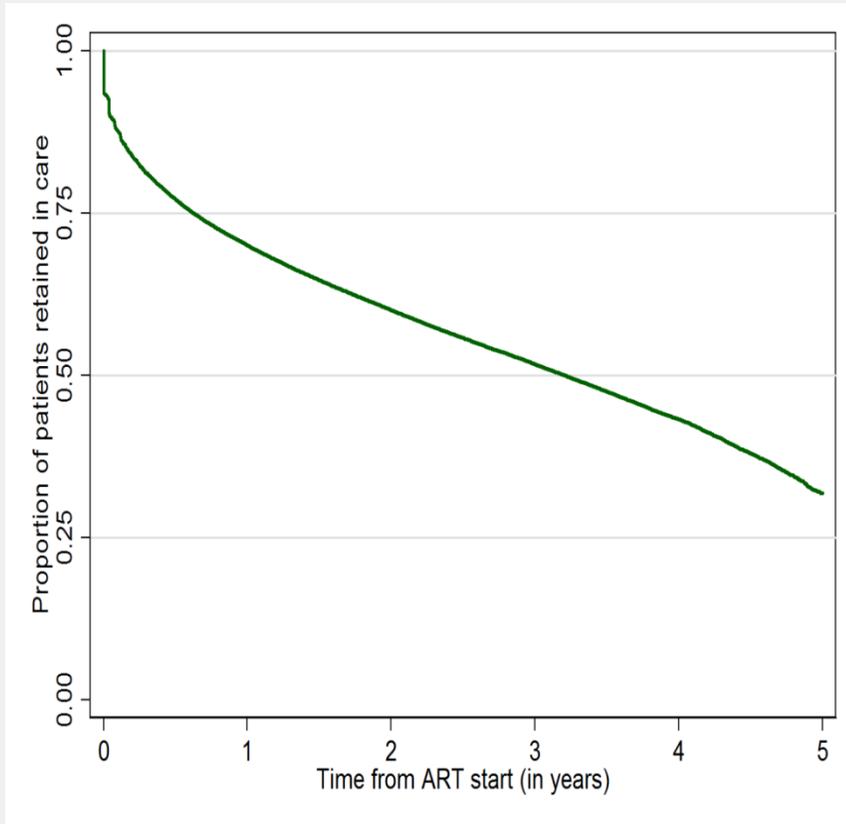

- N = 21,388, que iniciaram TARV entre 2000-2010 (não-IVDU)
- 83% com CD4 <350 ao começo de TARV

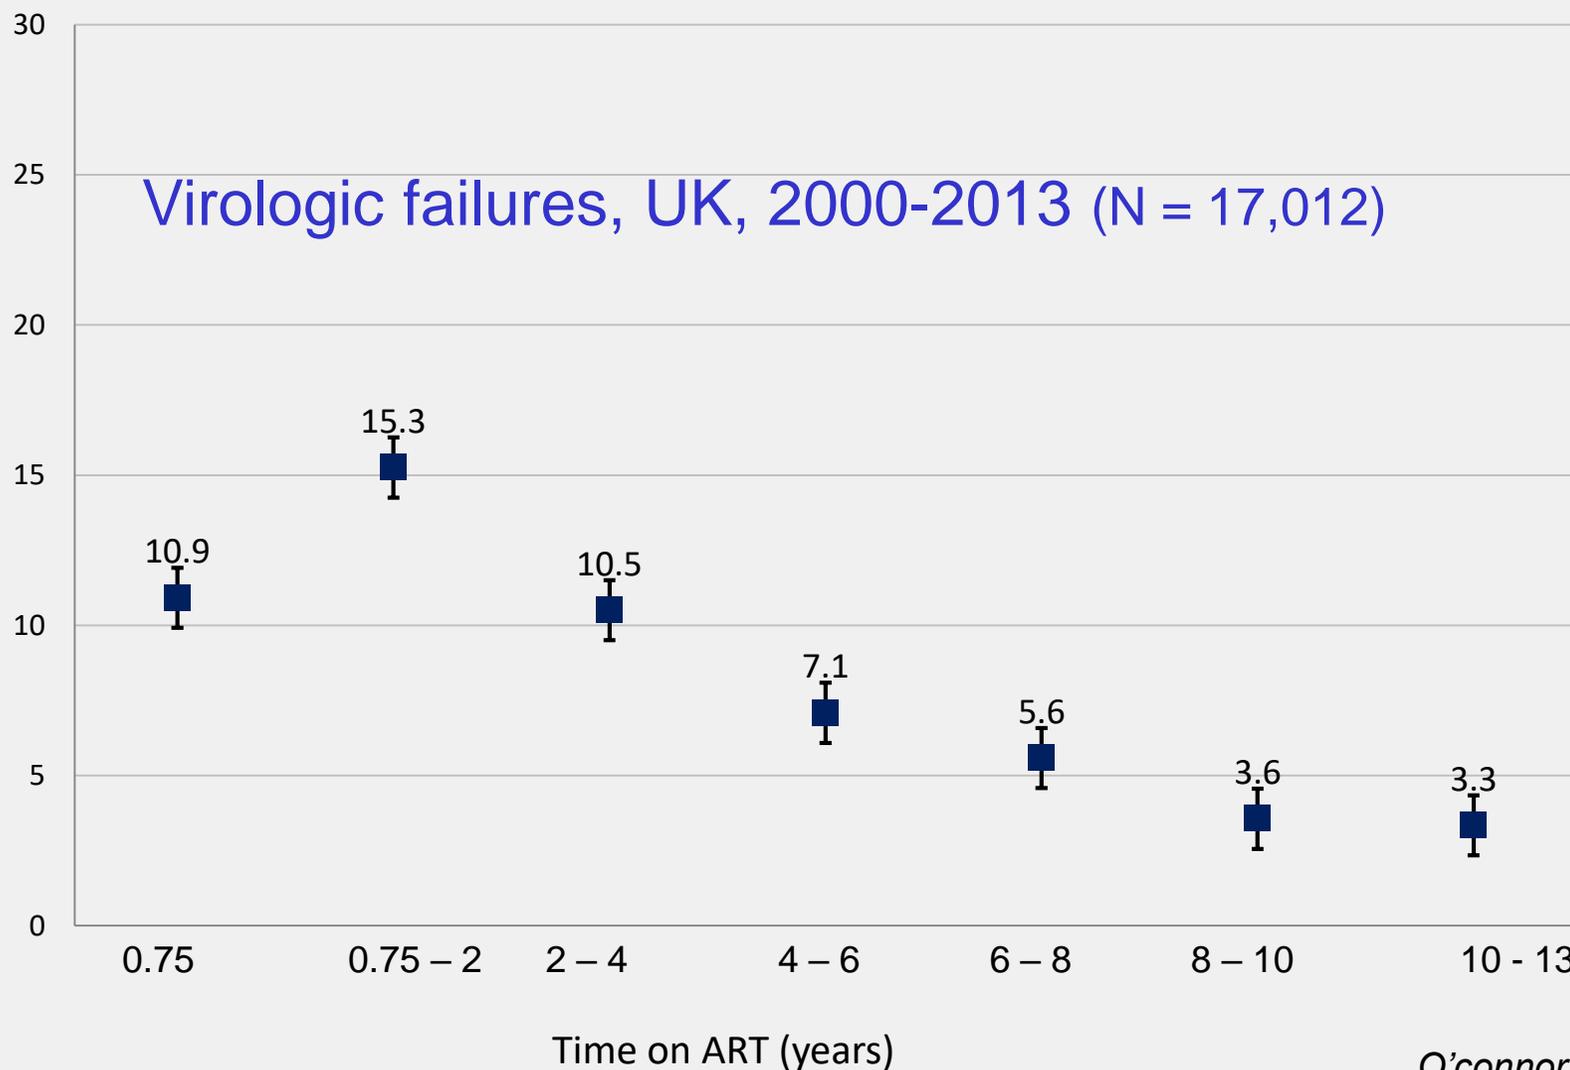

Retention in care Across the globe

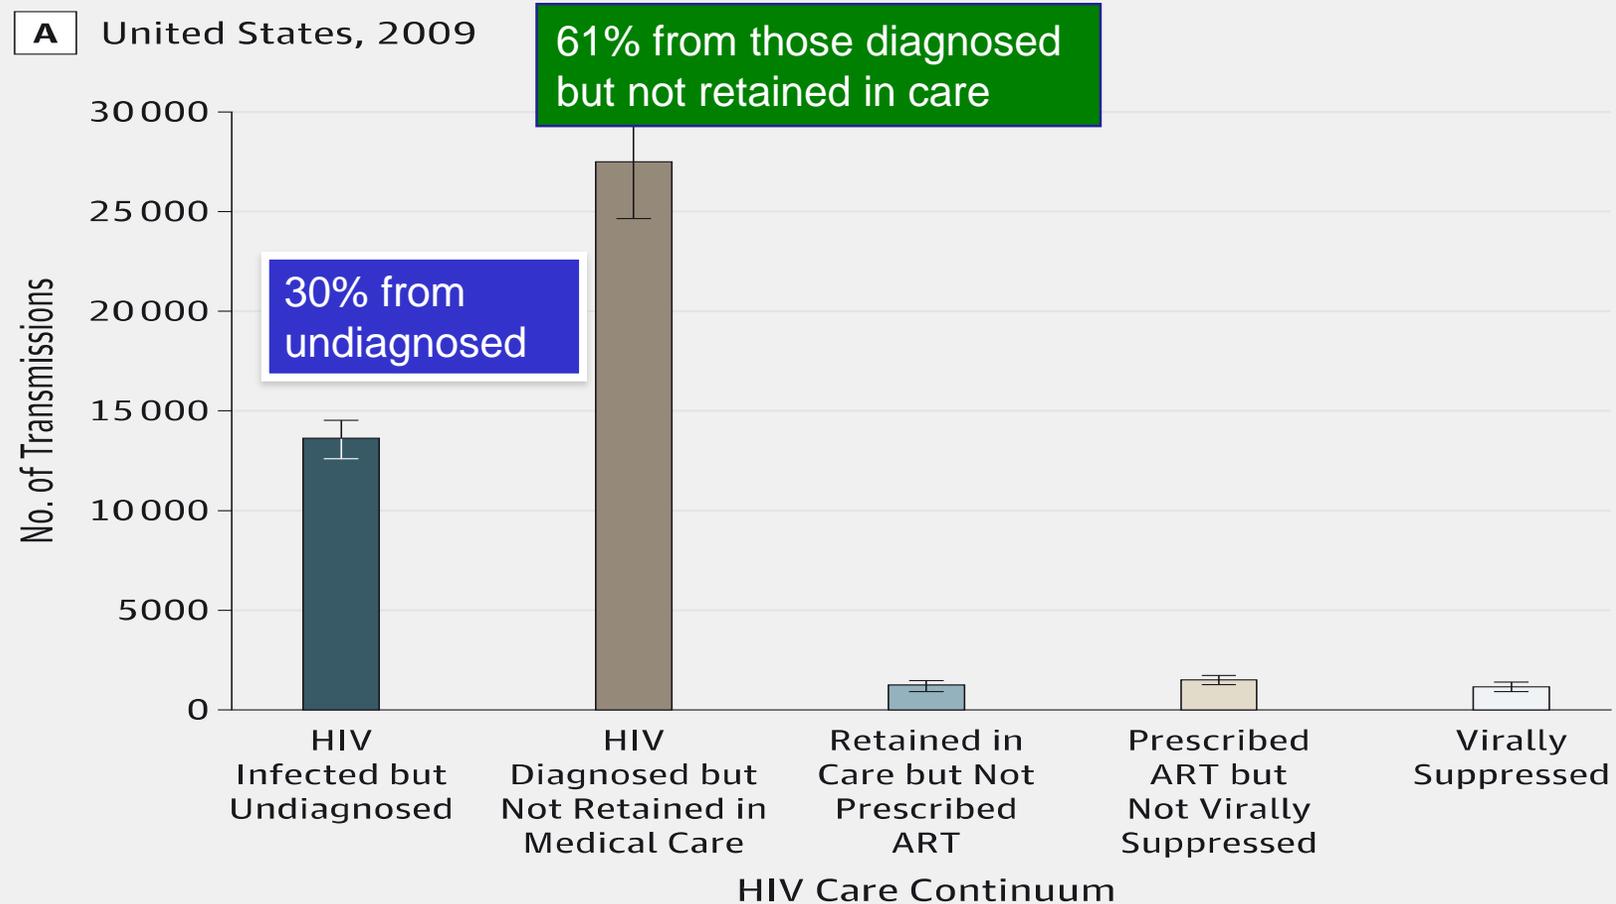

Retention in care in 41 countries

Undetectable Viral Load: Once there, one has to stay there

Origin of new transmissions in the USA

Retention in care and adherence to treatment:

What needs to be done?
What are the priorities?
