Catriona Gray Hey Philippines 🇵🇭, here's a #10YearChallenge @loveyourself.ph. In the last ten years, we've seen the cases of new HIV cases in the Philippines rise exponentially from only 1 a day in 2008 to 32 a day in 2018. While the numbers appear alarming, the data shows us that we've been able to reach the affected population and increase the access to testing, which is a key step to stop the rising epidemic.
