

## Using Antiretrovirals to Prevent HIV: Implications of the outcome of the CAPRISA 004 tenofovir-gel microbicide trial

**SAVE THE DATE: Tuesday, 20 July 2010, 6.30pm-8.30pm**

An official satellite of XVIII International AIDS Conference, Vienna, Austria  
Messe Wien Exhibition & Congress Center—Mini Room 10

The Global Campaign for Microbicides in partnership with CAPRISA, Treatment Action Campaign, and the International Aids Society-Industry Liaison Forum invites you to join an exciting, topical, and interactive debate on the implications of the results from CAPRISA 004, the first ARV-based candidate microbicide trial.

The results of the CAPRISA 004 trial testing tenofovir gel as a vaginal microbicide will be announced on Tuesday 20 July at 1pm at AIDS 2010, Vienna. The Tuesday evening satellite aims to further explore the results with an in-depth discussion engaging the study's two principal investigators. Leading scientists and advocates will debate the findings and their implications on the international HIV-biomedical prevention research agenda. They will explore the potential impact of microbicides on the HIV epidemic and ask the important question: what do these results mean for women?

Meeting Chairs:

Yasmin Halima, Director, Global Campaign for Microbicides  
Jim Rooney, Vice President Medical Affairs, Gilead Sciences  
Papa Salif Sow, Professor of Infectious Diseases, University of Dakar

Presentations:

Overview of the CAPRISA 004 results—Salim Abdool Karim, University of KwaZulu Natal  
Modeling the impact of vaginal microbicides—Brian Williams, SACEMA, Stellenbosch University  
Implications of CAPRISA 004 results on HIV prevention—Myron Cohen, University of North Carolina Chapel Hill

### **Panel Discussion 1: What do the CAPRISA 004 results mean for women?**

Moderated by Yasmin Halima

Quarraisha Abdool Karim, Co-Principal Investigator of CAPRISA 004, University of KwaZulu-Natal and Columbia University  
Samu Dube, Director of Africa Programmes, Global Campaign for Microbicides  
Vuyiseka Dubula-Majola, General Secretary, Treatment Action Campaign  
Catherine Hankins, Chief Scientific Advisor to UNAIDS

### **Panel Discussion 2: Scientific, research and policy implications of the CAPRISA 004 results**

Moderated by Timothy Farley, Dept of Reproductive Health and Research, WHO

Carl Dieffenbach, Director, Division of AIDS, US National Institutes of Allergies and Infectious Diseases  
Henry Gabelnick, Executive Director, CONRAD  
Emmanuel Njeuhmeli, USAID  
Yogan Pillay, Deputy Director General, South African Department of Health  
Renee Ridzon, Senior Program Officer, Bill & Melinda Gates Foundation
