From the 19th of October to the 6th of November 2020, the Adolescent Treatment Coalition and the Global Network of Young People Living with HIV present the yearly Intergenerational Summit. Being hosted virtually for the first time, the event will be presented in a different format, spread over 9 days, for 1 to 2 hours each day, with the aim of reaching a wider audience. The summit is free to join and now accessible to youth and youth serving organisations from all around the world.
Why attend the Virtual Intergenerational Summit

**LEARN FROM THE BEST**
Participate in dialogues and discuss best practices.

**CONNECT WITH PEERS**
Network with youth-led and youth serving organisations.

**BUILD YOUR CAPACITY**
Improve your knowledge by attending capacity building sessions.

**WHO WE ARE**

**THE ADOLESCENT HIV TREATMENT COALITION (ATC)**
ATC is a diverse coalition united in advocacy to make quality treatment and care available for all adolescent and young people living with HIV. It provides a collective voice promoting accountability in the global HIV response. It does this through calling attention to gaps, proposing solutions and working collaboratively on adolescent treatment issues.

**GLOBAL NETWORK OF YOUNG PEOPLE LIVING WITH HIV (Y+ GLOBAL)**
Y+ Global is a global network that aims to strengthen the leadership of young people living with HIV from local to global level, empowering them to be meaningfully engaged in political and programmatic spaces that impact their lives.
In 2020, young people still face significant barriers towards optimal, effective adolescent and youth leadership, including limited funding and support for youth-led networks, as well as limited youth participation in decision-making. Supporting youth leadership is crucial to ensuring that all adolescents and young people living with HIV (AYPLHIV) achieve equity in care and improving treatment outcomes.

The yearly Intergenerational Summit aims to foster a dialogue among youth leadership and youth-led and youth serving organisations, sharing best practices and providing capacity building to equip young people and youth led organisations to take the lead and accelerate youth objectives in the fight to end AIDS. This year’s summit with a transitional to being hosted virtually will be hosted over 9 days, for the duration of 1 to 2 hours each day, this will allow for a wider and easier participation of youth groups and youth-led or youth serving organizations globally.
