15:00 – 17:00	Fun4Kidz: Free play-, Sport- and Outdooroffer
17:00 – 17:30	Dinner4Kidz
17:300 – 19:45	Cinema4Kidz

#### PROGRAM

**Monday, 22<sup>nd</sup> of July 2024**  
**Science4Kidz**

##### Project4Kidz 1: Welcome4Kidz and comfort band aids

At the first day of the childcare service is all about welcoming your kids at „Kids @ AIDS 2024“.

Afterwards it says “with small injuries often a small comfort band aid helps”. We make colorful band aid boxes with your children, different materials and colors are available for this.

##### Project4Kidz 2: Mandala-Art-Academy for mental health

Children’s everyday life has changed a lot in recent years. School is no longer the only thing that demands more and more from our children. The constant overstimulation by mobile phones, PC’s and consoles makes it almost impossible for children to have quiet moments. With the Mandala-Art-Academy, we create an island of relaxation for nervous children’s souls. With mandalas, this is also really fun.

**Tuesday, 23<sup>rd</sup> of July 2024**

##### Project4Kidz 1: Virtual reality in medicine

Project4Kidz 1 focuses on the use of virtual reality in medicine. VR applications about human anatomy and our health allow your children to explore the human body first-hand. Project4Kidz aims to create kid-friendly VR experiences by letting children make their own VR goggles out of cardboard and special lenses, travel through the human body thanks to Vr and much more.

##### Project4Kidz 2: From virtual reality into reality

The afternoon program is all about tasting, feeling and smelling in the “real” world. We make our own delicious gummy bears, without chemicals or artificial flavors, with the help of our Events4Kidz gummy bear machine.

**Wednesday, 24<sup>th</sup> of July 2024 - Hygiene**

##### Project4Kidz 1: Hygiene

Finally, we deal with the topic of hygiene and deal with the question in an age-appropriate manner using exciting experiments: What is the purpose of hand hygiene? What role do bacteria play in hygiene?

##### Project4Kidz 2: Handmade soap

When we think of hygiene, we often think of soap and hand washing. A reason for us to make our own soap in the afternoon program. After all, what better way to tackle daily hygiene than with a homemade soap?

**Thursday, 25<sup>th</sup> of July 2024 - Research**

##### Project4Kidz 1: Research Academy

The Care4Kidz reasearch academy offers an educational program on researchers’ day, encouraging children to activitely shape their learning process through research-based learning. The program, catering to children aged five to seven and eight years and above, focuses on developing independent questions, finding answers, and fostering valuable experiences that boost self-confidence and social skills.

##### Project4Kidz 2: Strawbees creative workshop

The future relies on intelligent workplaces and creativity as a crucial skill. In the straw bee creative workshop, children solve tasks such as building an underwater robot to combat plastic waste or a wind turbine. And all this using only straws and small connecting pieces, the straw bees.

**Friday, 26<sup>th</sup> of July 2024**

##### Project4Kidz 1 – Animated film

Children who engage with animated films learn valuable skills and develop their full creativity. Designing characters, sets and props, recording dialog and scenes demands and encourages our full attention and strengthens our creative abilities. The focus of our animated film studio is AIDS 2024, to coincide with the 25th anniversary of the AIDS epidemic.

##### Project4Kidz 2 – my favourite game

Since it’s time to say goodbye, today it’s called – my favourite game. Each of the children can bring their favourite board game or toy and introduce it to us as a group. This will be a day of fun and games, perfect for saying goodbye.
